Mining and Financial News

BY REVIEW LEASED WIRE

NEW YORK, April 5.—At the outset of today's short but active session of the stock market indications pointed to a further advance of the general list under the guidance of rails, but profit taking in that quarter, also among oils, and renewed pressure upon steels created an irregular tone at the close.

Southern Pacific, the feature of yesterday's demonstration among rails, failed to make more than fractional improvement at any time and reacted 2 points when offerings exceeded demand. Reading and other coal shares also yielded their moderate gains. Sales amounted to 550,000 shares.

Mixed conditions in the stock market reflected the character of the heaviness of United States steel being ascribed to uncertainty regarding the outcome of the impending conference with the war industrial board.

The bank statement disclosed another large actual contraction of loans, a total of about \$87,000,000 in two weeks, but last week's decrease of actual reserve was replaced by a substantial increase.

Foreign bonds yielded slightly, but Liberty issues and standard rails and industrials were steady. Total sales, par values, aggregated \$6,775,000. Old United States bonds were unchanged on call during the week.

BANK CONDITION

NEW YORK, April 5.—The actual condition of clearing house banks and trust companies for the week shows that they hold \$50,852,590 reserve in excess of legal requirements. This is an increase of \$21,545,030 from last week.

COTTON MARKET

NEW YORK, April 5.—Cotton closed steady at a net advance of 55 to 79 points on new style months. Old style deliveries closed net 20 points lower to 100 points higher.

GRAIN MARKET

CHICAGO, April 5.—Notwithstanding that for distant deliveries corn today touched the highest prices yet this season, weakness prevailed in the market as a whole by reason of increased offerings to arrive from the country. Quotations closed heavy, 3/4 to 2c net lower, with May \$1.56 1/2 to \$1.56 3/4, and July \$1.48 1/2 to \$1.48 3/4. Oats lost 1/2 to 1c. In provisions the outcome ranged from 10c decline to 40c advance.

Selling pressure on corn seemed to be directed chiefly against the May delivery. The later months, too, suffered from liquidation, but not until the May-July difference had become 3 cents narrower than was the case earlier in the week. Cash owners led the selling of May. Renewed advice that labor difficulties at Buenos Aires were again threatening to curtail Argentine exports had only a transient bullish effect.

Oats followed the changes in corn. For the most part, trade was local. Provisions averaged higher with hogs. Prices for live animals overtopped all records since September.

WEEKLY FINANCIAL REVIEW

NEW YORK, April 5.—Economic events of vital importance engrossed the attention of banking interests this week, while the stock market continued its advance, with such passes and variations as might naturally result from realizing for profits and the tentative aggressions of the bear faction. The extent of public interest was again a matter of debate, but all available information confirms the belief that the side continues to have its main impulse from other than local sources.

Accession of bullish sentiment from interior points coincides with more stable conditions reported from various industrial centers.

Although a confused situation exists in the steel trade due to the controversy over prices trustworthy reports concur that leading mills are operating at a comparatively high rate of capacity.

Shipping, oils and metals were governed by influences applicable to those issues, but the breaking off of the Mercantile Marine deal, uncertain Mexican conditions and further readjustment of the market for copper exerted no perceptible effect.

Rails were the prominent feature of the late dealings, their strength suggesting something more tangible than a rally against the shorts. Buying of transportation of the investment class was almost without precedent in the varied movements of the past six weeks.

Rapid absorption of the notes offered by the war finance corporation testified to the underlying strength of the investment market, which is soon to be put to a greater test by the inauguration of the "Victory" loan.
